COMMENTS OF STAFF

a) Compliance Summary

The Compliance Summary was reviewed. Ms. Cherichetti began by describing the Minor Regulated Activity Inland Wetland Permits that were issued to 6 Point Road for the construction of a pool and 267 West Cedar Road for installation of soils and erosion measures. She also described applications that have passed permit deadlines and applications that will be reaching their deadlines. She described that 7 Rising Road has been referred to Corporation Counsel to seek legal action. Ms. Cherichetti added that a Notice of Violation was issued to 63 Cranbury Road for conducting Regulated Activities without an Inland Wetland Permit and that they would be submitting a Corrective Action Application.

b) Report of Senior Environmental Officer

None.

COMMENTS OF COMMISSIONERS

a) POCD implementation priorities

There were none discussed.

b) Report of Commission Chair

Mr. Hubbard discussed reappointment of Commissioners and the current vacancies. He spoke about the State of Connecticut's budget deficit and the possibility of the State looking to take funds from the Open Space Program at the state level. He stated his opposition of the idea, adding that State Senator Bob Duff has also been in opposition of the use of Open Space Preservation funds in supplementing the State's deficit. Mr. Hubbard suggested that the City of Norwalk Conservation Commission write to the State of Connecticut in their opposition in using Open Space Preservation Funds in offsetting the Budget Deficit.

All the Commissioners agreed.

Ms. Cherichetti said she would draft a letter to the State of Connecticut in regards to the use of the Open Space Preservation Fund.

PUBLIC HEARINGS (to begin at 7:00 p.m.)

- a) #S08-331 – 16 Scott Street – O'Brien – Corrective Action construction of retaining walls, shed and deposition of fill and removal of vegetation within a wetland and watercourse**

Public Hearing commenced at 7:05pm

Ms. Cherichetti called the roll.

Ms. Cherichetti began the hearing by stating that the Public Hearing had been continued from the last meeting in order for the applicant to notice the abutting property owners of his application. She added that although Mr. O'Brien was not in attendance the soil scientist that he had hired was there to explain the biological evaluation of the wetland area.

Otto Theall, Soil & Wetland Science, LLC, was present as the soil scientist for the applicant. He began by explaining the delineation of wetland soils on the property. He described that wetland soils were found along the drainage area both east and west of the driveway. The area that is of greatest concern is east of the driveway and between the existing southern retaining wall and at the edge of the proposed northern retaining wall. He added that when he was delineating wetland soils in the

field he did not have the topographic information and worked with just soil sampling. He obtained the topographic information from Ms. Cherichetti which helped determine the area that was disturbed but he was confident that the soil samples depict the extent of wetlands on the property. He added that the by using the topographical information he was able to determine where the applicant had deposited fill and where there was a cut into the soil. Mr. Theall added that the cut area adjacent to the southern wall east of the driveway had unintentionally created a wetland. He estimated that the 415 sq. ft. of the area was filled and 495 sq. ft. of wetland area was created.

Mr. Hubbard asked Mr. Theall to elaborate on how the new wetland area was created. Mr. Theall described the events leading to the creation of the wetland and the biological features that are present.

Ms. Cherichetti added that although the created wetland area was 495 sq. ft. it did not offset the volume of fill that was deposited in the area.

Mr. Theall described the options to remediate the wetland area and added that he would refer the applicant to an environmental consultant depending what the Agency would require.

Ms. Cagnina stated that the remediation options should not cause any further harm to the wetland area.

Ms. Cherichetti added that any mitigation options should be represented in alternate site plans that can be reviewed by the Agency.

Ms. Briggs added that site plans should include the applicant's intentions with the shed and additions that were not referred to in the current plan.

Ms. Cherichetti distributed a letter from the neighboring property owner.

**** THE PUBLIC HEARING WAS CONTINUED TO THE JANUARY 27TH 2009 MEETING.**

- b) #S08-337 – 4 Little Fox Lane – Giapoutzis – Corrective Action filling, construction of retaining walls, removal of vegetation and alteration of flow in and adjacent to a watercourse and wetland.**

Public Hearing commenced at 7:55pm.

Ms. Cherichetti called the roll.

Ms. Cherichetti began the hearing by stating again that the applicant had failed to notice the abutting homeowners. She added that the applicant was not present at the previous meeting but is in attendance tonight.

Theodore Giapoutzis, the applicant began by stating that he had not noticed the neighbors. He added that he did not see the reason as to why it was necessary for his neighbors to get involved in the process. He also voiced his opinion on the unfairness on the regulations and how the site work on his property was only done to protect his children. Mr. Giapoutzis added that the pond had been man-made and did not see why a having work done to a man made pond would even requires an initial permit be obtained. He also stated that completing the application would require a significant amount of money and he would rather tear the wall down if the Agency wanted him to.

Mr. Hubbard reviewed the reasons why a permit is required for the work that was done and described the process in which every applicant must adhere too. He described that because the Agency found the application to warrant a significant regulated activity it would be necessary for Mr. Giapoutzis to notice the neighbors to allow for public comment during the hearing. He also added that it would be in the applicant's best interest to comply with the regulations and obtain the necessary permit for the work completed.

Mr. Giapoutzis then asked what he needed to do in order to comply. Ms. Cherichetti described the application requirements and the need for the applicant to notice the abutting property owners in order to allow for public comment.

Ms. Cherichetti stated that the Agency was up against their statutory deadline and would need to close the Public Hearing at tonight's meeting unless they received an extension from the applicant.

Mr. Hubbard suggested that Mr. Giapoutzis ask for an extension of time to continue the Public Hearing to allow him time to comply with the application process.

Mr. Giapoutzis submitted a letter requesting that the Agency extend the Public Hearing to the meeting on February 10th, 2009.

**** THE PUBLIC HEARING WAS CONTINUED TO THE FEBRUARY 10, 2009 MEETING.**
