

AGENDA

Bike/Walk Task Force
Monday, November 3rd, 7 pm
Health Department Conference Room, 137 East Ave.

- 1.) Presentation of latest digital progress of Comprehensive City-Wide Bike Route Plan by Health Department employee Kaitlin Latham.
- 2.) Progress on providing website information (through the Health Department as discussed earlier) , with rules of the road and events listed, and a place for task force information which the public can access.
- 3.) Education efforts including a public statement of support for the Health Department's Norwalker program, possible sponsorship of city-wide walks/bike tours like last month's Library 5k walk, and to discuss future safety education programs like co-sponsoring bike rodeos at the schools which other groups are doing already. Need more info on this.
- 4.) Funding sources including grants, CDBG, etc (summarized well in the Ped/Bikeway Plan on pages 47-51, with a summary table on Page 51.) and a discussion of supporting DPW's budget request for 2015/16 for a new restriping contract separate from repaving, so we can start adding bike lanes and sharrows without waiting years for repaving, as it is now the only way we can pay for it apparently without any other source of funding.
- 5.) Old and New Business
